

SB, 357 XP, 359, Oil suction hose, 2004-10

Seal grooves have been introduced on the oil suction hose to improve the supply of chain oil. The seal grooves strengthen the sealing surface between the pump housing and the oil suction hose, this results in a reduced risk of leakage and air being drawn in.

Full replaceability prevails. Part no. unchanged.

Introduced from serial number: 357XP 042300001
359 042300001
